

# IMPORTANT PUBLIC ANNOUNCEMENT

**Let's be sure to push our bikes in certain areas with traffic.**

For example, Fukui Station's west gate is home to much civilian traffic, so let's be sure to take any safety precautions we can and get off of our bikes to push through these areas. I am sure most would agree that any collision is easier avoidable while pushing a bike rather than riding it through a highly densely populated area.

Many people pass through the station and in the shopping areas around there, so let's be sure we get off of our bikes and push. For the safety of ourselves and those around us, let us at least do this much and obey the law of the land.

Please take into consideration not only your own safety, but the safety of those around you is also important. That being said, a map will be provided to assist understanding.
